Arch Flags

Sizes Available:

3.1m high x 4.5m wide

Important info:

- For easier assembly, we recommend that two people complete the setup.
- Ground spikes or water fillable bases required.
- Comes in side zip carry bag for easy transportation.

- Perfect for race days and event entrances.

Assembly Steps

1

Lay out all components – including the bungee poles, ground poles, and graphic – to ensure everything is present before assembly.

2

Connect the bungee poles together to form one long, straight flag pole.

3

Slide the graphic onto the assembled flag pole, carefully feeding it through the pole pocket.

4

Continue pulling the graphic along until the entire pole is fully inserted.

5

Slot each end of the now-graphiced flag pole onto the wider ground poles. Attach the graphic to the flag clip adjusters to hold it in place.

6

Gently bend the assembled structure into an arch shape and affix to your bases. Do not bend beyond the intended curve to prevent damaging the hardware.*

* **Please note:** We're not able to take responsibility for any damage outside of the warranty - like damage from over-bending or improper use of the product.
